PROJECTS

Skill-Based Study Buddy

Web Application - Python, HTML/CSS/JavaScript

- Skill-Based Study Buddy is a personalized educational web application designed to assist students in enhancing their skills through tailored learning resources and interactive tools.
- Built a user-friendly, responsive web interface using HTML/CSS, enhancing the student experience and usability. Integrated **MySQL** database for storing all students login data.
- The primary goal is to create a personalized and skill-oriented study assistant that helps learners efficiently access resources, practice relevant problems, and collaborate with peers — all in a visually consistent and easy-to-use interface.

Java GUI Application (JDBC-Based)

Technologies: Java Swing, JDBC, MySQL

- Designed and developed a desktop based Hotel Management System using **Java GUI** and **JDBC** for backend connectivity.
- Implemented core modules including: 1.Room Allotment, 2.Pickup Service, 3.Employee Management , 4.Room Cleanliness Tracking.
- Integrated with MySQL for real-time data storage and retrieval. Ensured a responsive and intuitive interface for seamless user interaction.

CERTIFICATION

Understanding Basic SQL Syntax - Coursera project network

Foundation of CyberSecurity - Google & Coursera

Django Web Framework - Meta & Coursera

Full-Stack Development with Django - Coursera project network

Zero Trust Cloud Security Virtual Internship - EduSkill & ZScaler

Data Science Master Virtual Internship - EduSkill & Altair

POSITIONS OF RESPONSIBILITY AND VOLUNTEERING

Media Team Head at Kridarambh

Feb 2025 – Present

I was Head of the Media Team in Kridarambh, working with a team of 5 members. We were responsible for capturing event highlights, managing social media updates, and creating engaging content to showcase the spirit and energy of the event.
